

操作sorted set

```
// 5.操作sorted set-有序
@Test
public void testSortedSet() {
    Map<String, Double> scoreMembers = new HashMap<>();
    scoreMembers.put("zhangsan", 7D);
    scoreMembers.put("lisi", 3D);
    scoreMembers.put("wangwu", 5D);
    scoreMembers.put("zhaoliu", 6D);
    scoreMembers.put("tianqi", 2D);

    // 添加数据
    jedis.zadd("score", scoreMembers);

    // 获取数据
    Set<String> scores = jedis.zrange("score", 0, 4);
    for (String score: scores) {
        System.out.println(score);
    }

    // 获取总条数
    Long total = jedis.zcard("score");
    System.out.println("总条数: " + total);

    // 删除
    //jedis.zrem("score", "zhangsan", "lisi");
}
```
