

操作set

```
// 4.操作set-无序
@Test
public void testSet() {
    SetOperations<String, Object> setOperations = redisTemplate.opsForSet();
    // 添加数据
    String[] letters = new String[]{"aaa", "bbb", "ccc", "ddd", "eee"};
    //setOperations.add("letters", "aaa", "bbb", "ccc", "ddd", "eee");
    setOperations.add("letters", letters);

    // 获取数据
    Set<Object> let = setOperations.members("letters");
    for (Object letter: let) {
        System.out.println(letter);
    }

    // 删除
    setOperations.remove("letters", "aaa", "bbb");
}
```
